

Symetal and Elval scored a double-award victory with Quintiq implementations

Greece-based Symetal and Elval of Viohalco S.A., a Belgium-based holding company of leading metal processing companies across Europe, celebrated a double victory at two prestigious industry awards recently. Recognition from these long-standing awards (in their 10th and 21st editions respectively) further strengthens the trust that these companies have in Quintiq as their technological partner, a relationship that started with their first solution implementation in 2008.

The first award won is for Quintiq's slitting optimization solution that earned Symetal top distinction for the Private Sector Excellence Award in the 2017 World Information Technology and Services Alliance (WITSA) Global ICT Excellence Awards held in Taipei, Taiwan. The solution's optimization capability helped Symetal's slitting operations achieve optimal order combinations and reduce scrap significantly. Quintiq supports Symetal's strategic re-engineering of its production process to improve delivery performance, reduce production lead time, maximize production volume and reduce inventory.

The second is a trophy for Elval in the manufacturing category of the Logistics & Supply Chain Excellence Awards 2017 held in London, UK. Quintiq's system covers multiple functions within Elval's business – from planning, supply chain and sales to production. With flexible and transparent planning of various production flows, such as casting, hot-rolling, cold-rolling and finishing, Elval is able to significantly improve on-time, in-full (OTIF), reduce inventory/cycle times, increase throughput and lower costs. This provided a major boost to Elval's business competitiveness, allowing Elval to operate in new markets despite its location being one week's transport time further away from customers than its main European competitors.

These two awards are testament of Quintiq's end-to-end and multi-horizon planning support capabilities, at the strategic level right down to daily operations.

About Symetal

Symetal is a member of [Elval Group](#), the major constituent of Viohalco's aluminum manufacturing, processing and marketing segment. Elval is under [Viohalco S.A.](#), a Belgium-based holding company of leading metal processing companies across Europe.

About the WITSA Awards

Every two years at the World Congress on IT, the WITSA Global ICT Excellence Awards recognize innovative digital solutions capable of transforming the wellbeing, prosperity, connectivity or productivity of others around the world. Nominations are received from WITSA's network of ICT industry associations in 80 countries around the world for seven broad categories: Public Sector Excellence, Private Sector Excellence, Mobile Excellence, Digital Opportunity, Sustainable Growth, Innovative e-Health Solutions and Emerging Digital Solutions.

About the Logistics & Supply Chain Excellence Awards

Logistics & Supply Chain's Supply Chain Excellence Awards were launched as an initiative to recognize and reward organizations around the world that demonstrate excellence in their supply chain operations.

About Quintiq

Every business has its supply chain planning puzzles. Some of those puzzles are large. Some are complex. Some seem impossible to solve. Since 1997, Quintiq has been solving each of those puzzles using a single supply chain planning & optimization software platform. Today, industry-leading companies across the globe rely on Quintiq software to plan and optimize workforces, logistics and production. Part of Dassault Systèmes (Euronext Paris: #13065, DSY.PA), Quintiq has headquarters in the Netherlands and the USA and offices around the world.
